

Presentation # 3

Presenter: Shawn Otal, METSCO

Title: A Roadmap of Anticipated Customer Load

Biography

Shawn Otal has 30 years of broadly based experience in business administration, strategy, engineering, finance and economics. His professional career began with an engineering position with the City of Calgary Electric System which lead to a marketing and client liaison opportunity with Westinghouse. In 1992 he joined the T&D Division at Acres International and provided consulting services to Canadian and overseas power sector companies. In 2001, he joined Kinectrics Inc and established the asset management strategy portfolio. In 2006, he founded his consulting firm METSCO, specializing in mentoring of engineering professionals in the power sector.

In a consulting role, Shawn takes on assignments involving due diligence and valuations for T&D utility mergers and acquisitions, independent review of investments in support of rate order applications and power sector planning assignments. He is currently serving as the interim VP Engineering and Operations for Oshawa PUC.
