

Hydropower Conference

March 15-16, 2022 • Palm Springs, CA

The Past, Present, and Future of Hydropower

CEATI International's 13th Annual Hydropower Conference will focus on understanding on how previous incidents have shaped the current practices, and ensuring hydropower business success in future markets.

1. The Past – Lessons Learned and the Changes that Resulted

- Lessons learned from past incidents and implications today
- Human factors at play
- The Influence of past incidents on design standards and current practices

2. The Present – Current Strategies

- Aging infrastructure and risk factors
- Decommissioning vs. rehabilitation and life extension
- Cost saving requirements for operation and maintenance
- Current operational constraints and balancing the use of shared watersheds

3. The Future – Ensuring Success Moving Forward

- Adapting assets to new operational constraints
- Increasing value in hydro generation
- Environmentally acceptable solutions
- Integrating intermittent renewable energy

Who Should Attend?

- Electric utilities and dam owners
- Consultants
- Equipment manufacturers and suppliers
- Research facilities and laboratories
- Academics

This event is supported by the following member utilities:
