

Transmission & Distribution Conference

Strategies and Methodologies for Driving T&D Line Efficiencies

November 19-20, 2019 • Palm Springs, CA

OVERVIEW

The electric utility industry is in transition, stimulated by changing customer expectations and technological advances. Electric utilities are starting to see declining or flattening revenues in their regulated business along with increasing expenses. This economic pressure is encouraging the industry to improve its operational efficiency.

This conference will explore practical, cost-effective approaches and methodologies that utilities can employ to reduce their operating expenses, while preserving reliability performance and customer satisfaction. Methods for decreasing technical losses will also be addressed.

This conference will focus on inspections and preventative maintenance activities for overhead transmission assets, as well as overhead and underground distribution assets. Industry experts and utility presentations will provide practical methodologies that utilities will be able to implement both now and in the future to improve their inspection and preventative maintenance activities, to reduce their operational costs, or to increase their value.

THEMES

- Getting the Best Value for your T&D Inspection and Maintenance Activities Today
- Getting the Best Value for your T&D Inspection and Maintenance Activities in the Future
- Strategies and Approaches to Cost Effectively Reducing Technical Losses

WHO SHOULD ATTEND?

- Transmission and Distribution Managers and Supervisors
- Transmission and Distribution Engineers and Engineering Supervisors
- Asset Managers
- Consultants, Service Providers, and Contractors
- Equipment Manufacturers and Vendors
- Research Facilities and Laboratories
- Academics

This conference is created with the help of our utility members:
