- Education, background and career path to date
- Organizations & activities related to supporting women in the industry.
- International Women's Day 2020 – OPG event
- Other events in Spring 2020
- Questions

### *Biographical Summary*

---

Jane Travers is the Vice President of Asset Management & Optimization at Ontario Power Generation. In this role, Jane is responsible for the optimization of Renewable Generation's fleet, which includes 66 hydroelectric stations, two thermal sites and a new solar facility.

Jane's team is transforming a 100 year-old business through the implementation of innovative solutions, connecting the workforce from every part of the province with technology to ensure staff have information at their fingertips.

Having delivered the world's single largest climate action to-date by closing its coal stations, OPG is poised to lead the decarbonization of other sectors. A robust, efficient hydro fleet is critical to this effort.

In 2019, Jane received the Woman of Distinction Award by Waterpower Canada, recognizing her leadership for the advancement of women in the energy sector.

# CEATI **WOMEN IN POWER** INTERNATIONAL **GROUP**

## Group Mandate & Objectives

- Networking with other women in the industry;
- Promoting engineering to women in the field, especially to new engineers and those just starting out in their career;
- Sharing common challenges and strategies for overcoming obstacles as females in a male-dominated field; and
- Brainstorming together to identify common patterns and develop new strategies for educating colleagues and superiors on how to successfully encourage and support females in the field.
